

TALLORDER SOLUTIONS

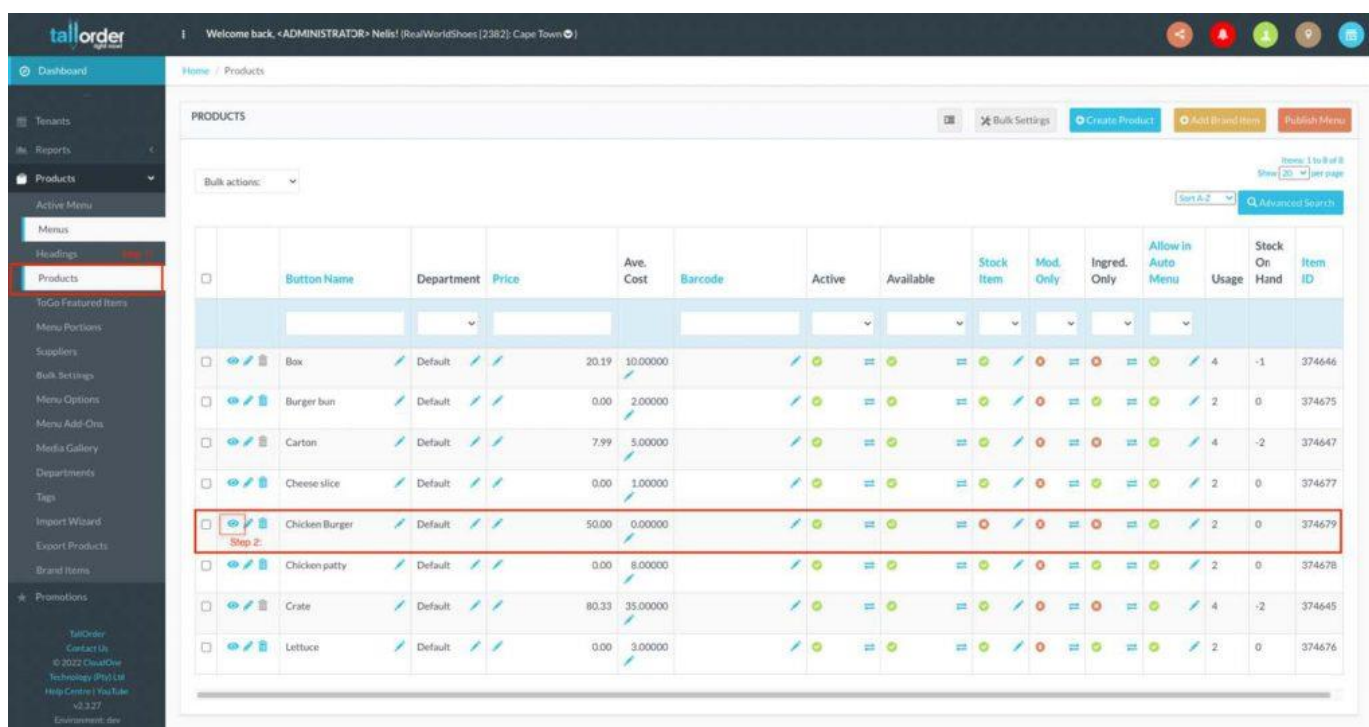

CREATING RECIPES FOR

PRODUCTS ON ADMIN

Recipes can be used for products that are not bought and need to be made in the kitchen, need to be assembled by staff members, for instance when we have a burger on the menu those burgers have to be prepared with ingredients such as a patty of some sort, lettuce, cheese and tomato. Recipes will help keep track of the stock used to assemble these and help calculate the profits of selling this produced item.

STEP 1:

Log onto Admin and into your merchant and go to the "Products" sub-menu on the left side of the page, on this page click on the eye icon on the product you'd like to add a for.

The screenshot shows the TallOrder admin dashboard. The left sidebar has a 'Products' menu item highlighted. The main content area displays a table of products. The 'Chicken Burger' row is highlighted with a red box, and a red arrow points to the 'View' icon (eye) in the first column of that row, labeled 'Step 2:'. The table columns include: Button Name, Department, Price, Ave. Cost, Barcode, Active, Available, Stock Item, Mod. Only, Ingrid. Only, Allow in Auto Menu, Usage, Stock On Hand, and Item ID.
