

# Sync Your Online Stores & Sales

## TallOrder + Shopify

**TallOrder POS** integrates directly with **Shopify**, enabling your business to operate as one unified system — online and offline. Manage your product catalog, orders, and customer data in one place, with real-time syncing across platforms. Thanks to **MyStock 4 Accounting**, your inventory and supplier data flow seamlessly into your accounting platform — whether you're using **Xero** or **Sage** — for accurate cost tracking, VAT, and financial visibility.

No duplicate work. No recon headaches. **Just smart, simplified operations.**

### Centralised Inventory Management

Know exactly what's in stock with MyStock 4 Accounting, your product quantities, costs, and supplier activity are tracked in one place — *whether sales happen at your till or on your Shopify store.*

### Integrated Accounting, Done Right

TallOrder POS and MyStock 4 Accounting streamline your backend by pushing financial data into your preferred accounting system — *giving you cleaner books, faster month-end processes, and better decision-making.*

Source	Data Synced	Destination
Shopify	Online orders, products, customer info	myStock 4 Accounting
myStock 4 Accounting	Sales summaries, VAT, COGS	Xero/Sage
myStock 4 Accounting	Supplier Invoices, GRNs, returns	Xero/Sage

- Real-time syncing of online orders
- Daily financial posting to Xero/Sage
- Unified stock across channels

### Why Integrate **Shopify** with TallOrder?

#### Shopify to myStock Sync

Orders, products, and customers updated in real time.

#### Unified Stock Tracking

Inventory syncs across online and physical locations.

#### Full Accounting Integration

Push clean data to Xero or Sage automatically.

#### Single Customer View

View sales history across online and in-person channels.

#### Scales With You

Built for growing, multi-channel businesses.
