

Sync Your Online Stores & Sales

TallOrder + WooCommerce

With our direct **WooCommerce** integration, **TallOrder POS** bridges the gap between your website and your physical operation — making it easier to manage products, process online orders, and track real-time stock and financials. When connected through **MyStock 4 Accounting**, you also gain seamless flow into your accounting software — syncing sales, supplier invoices, and cost of goods into **Xero** or **Sage**.

No more manual entries. No more mismatched stock. **Just one clean, connected system.**

Inventory You Can Trust

Through MyStock 4 Accounting, stock is automatically updated when sales happen online or in-store. Supplier orders and GRNs feed directly into your stock control, giving you real-time insight and accurate margins.

Get Paid & Stay Compliant

We make sure your WooCommerce sales go exactly where they need to be — *your POS, inventory, and accounting platform*. Whether you use Xero or Sage, you can map products, track VAT, and generate reports in a few clicks.

Source	Data Synced	Destination
WooCommerce	Online orders, products, customer info	myStock 4 Accounting
myStock 4 Accounting	Sales summaries, VAT, COGS	Xero/Sage
myStock 4 Accounting	Supplier Invoices, GRNs, returns	Xero/Sage

Real-time syncing of online orders	Daily financial posting to Xero/Sage	Unified stock across channels
