

Sync Your Sales & Inventory with Xero

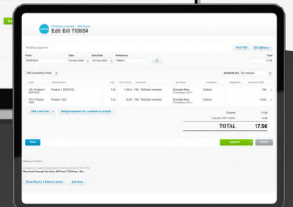

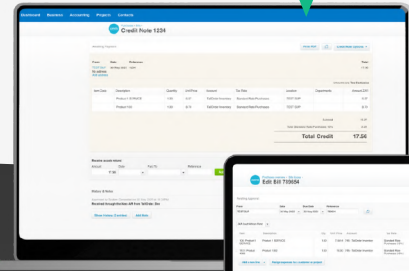

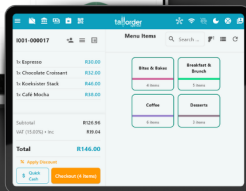

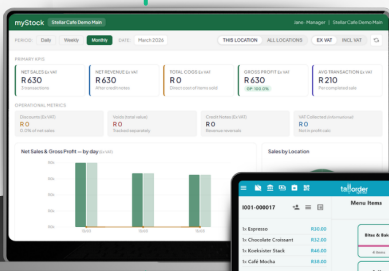

Meet myStock 4 Accounting
Your bridge between inventory and Finance

Integration Overview

myStock 4 Accounting links **Xero** with enterprise-class inventory control. Designed for businesses operating across multiple stock locations, **myStock** brings structured, approval-driven inventory workflows directly into **Xero**.

With powerful two-way integrations between **Tallorder POS**, **myStock 4 Accounting** and **Xero**, you can sync every sale, return, and supplier invoice directly to your accounting system — and pull key financial databack, including invoices and credit notes, to ensure your inventory always reflects the latest Activity. **TallOrder POS**, together with **MyStock 4 Accounting**, gives you complete control over your inventory. Enjoy features like stock takes, purchase orders, and real-time reporting. With this integration, businesses can finally experience the robust inventory control once limited to large enterprises, **without the complexity or cost**.

Sales, Invoices, Credit Notes, Payments, Supplier Credit Notes, Journals for Stock Movemenets, Petty Cash

Invoices, Credit Notes

Say Goodbye to...

- ❌ Multi-site operations becoming a tangle of spreadsheets and siloed reports.
- ❌ No real-time inventory visibility causing stockouts, overstocking and missed sales.
- ❌ Manual exports, data re-entry & reconciliations that slow you down and open the door to errors.

Feature Highlights

Customisable Dashboards

Automate Invoicing & Purchase Management

Integrated Financial Reporting

Real-Time Inventory Tracking

Key Benefits

Inventory + Accounting

MyStock 4 Accounting ensures that supplier invoices, stock movements, and returns are synced with Xero — closing the gap between *operations and finance*.

Cloud-Based & Fully Integrated

Sales, payments, and inventory data flow from TallOrder POS and MyStock 4 Accounting into Xero — securely stored in the cloud and accessible anytime, from anywhere.

Smart Integration Automation

Syncs transactions in real time to Xero, reducing manual entry and errors. Includes sales, payments, suppliers, accounts, and stock — automatically mapped for you.

Easy Reconciliation & Tracking

Monitor payments, revenue, and profit margins by store, product, or staff with summary reports — *making it easier to stay financially* in control.
