

# Smarter Inventory

## Take Control of Your Stock

Track, manage, and optimise your stock in real-time — **no spreadsheets, no guesswork.**

## TallOrder Solutions

**myStock**, powered by [www.tallorderpos.com](http://www.tallorderpos.com), serves retail, hospitality, and service businesses — from restaurants and cafés to salons and boutique hotels — giving you full control of inventory from back-of-house to balance sheet. Integrated with **TallOrder POS** and accounting tools like **Xero** and **Sage**, **myStock** automates stock tracking, usage, and replenishment in real time. Features like supplier cost management, wastage tracking, and smart reporting help cut losses, save time, and improve profitability — all from one platform built to scale with your business.

## The TallOrder Advantage

### Seamless POS Integration

Effortlessly integrate with TallOrder POS for real-time stock updates and inventory deductions at the point of sale.

### iCount™ Mobile Stock Taking

Ditch clipboards and spreadsheets — Our iCount™ tool enables fast, accurate stock takes on tablets and smartphones.

### End-to-End Inventory Actions

myStock manages POs, requisitions, returns, transfers, and wastage — all in one place with traceable logs.

### Manage Production & Recipes

Manage on-demand or batch production, recipes, and bills of materials with support for multiple units of measure.

### User Controls & Approvals

Assign permissions, approval rules, and access per stock location. Control who sees what, and who signs off, to ensure accountability.

### Advanced Reporting & Insights

Get clear insights into your inventory health with smart forecasting, shrinkage control, and cost-of-sales tracking.
